COMPANY PROFILE 2026

PT INFINIX DELAPAN TEKNOLOGI NUSANTARA

A Telecommunications Technology Bridge from Indonesia to the World

CORPORATE PHILOSOPHY

Like rivers that meet in the sea, IDTN connects data and information to the whole world.

Sebagaimana sungai-sungai yang bermuara di lautan, IDTN menghubungkan aliran data dan informasi ke seluruh penjuru dunia.

BUSINESS FOCUS

1. DWDM Equipment Developer:
   Developing and adapting cutting-edge optical transport equipment in close collaboration with international technology principal T8 Systems to meet Indonesian SDPPI standards, national geography, and operator needs.

2. DWDM Infrastructure Service Provider:
   Designing, deploying, testing, and maintaining mission-critical fiber optic transmission links for transportation corridors, hyperscale data centers, and telecommunication backbones with 24/7 preventive support.

STRATEGIC APPLICATION SECTORS

? Telecommunication Operators: High-capacity multi-terabit long-haul backbones and metropolitan loops.
? Hyperscale Data Centers (DCI): Low-latency interconnections with sub-50ms optical protection switching.
? National Railways & Transport: Mission-critical optical communications along national transit corridors.
? Aviation & Maritime: Redundant communication links for radar, flight tracking, and island logistics.

TECHNOLOGY PRINCIPAL PARTNER

PT IDTN is the official partner of T8 Systems (https://t8.ru/en/), an internationally recognized manufacturer of DWDM telecommunications systems. T8 holds world records in unrepeatered 100G/400G optical transmission and has deployed over 120,000 km of DWDM links globally.

OFFICIAL HEADQUARTERS & CONTACT

PT Infinix Delapan Teknologi Nusantara (IDTN)
Fatmawati City Center, Ruko Soho Botany Garden Crystal No. 18,
Jl. Fatmawati Raya, Cilandak Barat, Jakarta Selatan 12430, Indonesia
